Matt Rosenberg Yair Rabinovitz

What does the software do?

The software is a system to analyze sports bets and compare them to predictions to find value (edges).

Who can use it?

It can be used by anyone who wants to make valuable sports bets and maximize their chances of winning.

Why would they use it?

They can use it to help them find the bets which provide the most value relative to the odds and their prediction.

The software allows him to retrieve the top bets in the system. He can get however many top bets he wants.

He can also get the top bets for a specific team, sportsbook, or prop.

How do they use it?

In order to use it, one would insert the data for all bets he would like to consider, and then insert his predictions. The predictions will be what he thinks are the real odds for a certain prop, or he may get them from espn or some other source he finds reliable

Once he puts in the data, the software will sort all the bets for him, so he can easily retrieve the best ones according to whatever conditions he requires.
